

LAURENTIAN UNIVERSITY'S LET'S TALK SCIENCE PARTNERSHIP PROGRAM AND THE FOODSHED PROJECT BRING HANDS-ON GARDENING ACTIVITIES TO THE ENGLISH AND FRENCH DAYCARES AT LAURENTIAN UNIVERSITY

By Cathy Orlando, Science Outreach Coordinator to the Dean of Science and Engineering at Laurentian University, July 7, 2009

On June 23, 2009, Laurentian University's Let's Talk Science Partnership Program and The Foodshed Project brought potted vegetable plants to the French and English Daycares at Laurentian University. The tomatoes, cucumbers, marigolds, and lettuce were donated by Botanix Azilda Greenhouses, and grown by The Foodshed Project thanks to the generous support of the Sudbury Developmental Services Therapeutic Greenhouse Program. The funding for this project was made available through the Ontario Trillium Foundation and a special grant for garden supplies from the National Office of Let's Talk Science.

Many thanks to all of the funders and community partners that made this project possible!

THANK YOU TO OUR COMMUNITY PARTNERS, BOTANIX AZILDA GREENHOUSES AND SUDBURY DEVELOPMENTAL SERVICES THERAPUTIC GREENHOUSE PROGRAM

Possible through funding for The Foodshed Project from The Ontario Trillium Foundation
