

Exhaust gases contribute to global warming
- if you reduce your energy use you
help protect the environment

Home Heating Tips - upgrade to a high efficiency furnace for maximum savings

- ✓ Be sure return air vents are not blocked
- ✓ Open upstairs bedroom doors during the day
- ✓ Adjust registers for heat flow
- ✓ Turn heat down at night and if you are away during the day - use a programmable set back thermostat
- ✓ Keep bathroom door closed with the fan on to exhaust moist air
- ✓ Do not keep the bathroom fan on all the time - it removes too much heat from the home
- ✓ In the day, open curtains to let windows dry off - keep curtains closed at night to keep the heat in
- ✓ Clear the floor area around the furnace and water heater
